### Description

The Q-Zone Hoop-Frame is a whole new type of machine-quilting frame that easily manages fabric like a quilting hoop. With its small space-saving form factor you can set it up in any room and still quilt even the largest projects!

We know you'll love the Hoop-Frame Quilt System?

It removes your need to push quilts around on a table and gives your needle the freedom of gliding over fabric with the precision of an artist. Complete any size quilt on this frame, from crib, queen, king and larger.

Finish more quilts faster than ever before.

True-Color balanced light bar gives you the full view of your project without color shift.

### BUILD THE PERFECT QUILTING SYSTEM USING YOUR OWN MACHINE

The Q-Zone Hoop-Frame is perfect for cross-brand compatibility and made to work with many quilting machines, from domestics to longarms with up to a 19-inch throat space.

#### WORK SITTING OR STANDING

The Q-Zone Hoop-Frame can conveniently adjust to let you quilt in the way that is most comfortable to you. Quilt standing, or from your favorite chair. While sitting, the small footprint of the frame will let you still reach both ends with your quilting machine.
